GENERAL INTRODUCTION.

THE Provincial Cabinet of Coins, which is now temporarily accommodated in the Public Library, Shillong, owes its origin to a suggestion made in 1904 by Mr. H. Corkery, Assistant Secretary to the Chief Commissioner of Assam. Mr. Corkery's proposal that a collection of Assamese coins should be made was approved by the Hon'ble Mr. (now Sir) Bampfylde Fuller, and steps were accordingly taken to collect such coins. An appeal to the Deputy Commissioners of the Surma and Assam Valleys resulted in about 30 coins being acquired through their efforts, and a collection of 22 coins was also presented by Munshi Muhammad Shah, of Jorhat. Major (now Lieutenant-Colonel) P. R. T. Gurdon, I.A., was placed in charge of the Cabinet, and at the beginning of 1905 a proposal to include the collection amongst those benefited in the distribution of Treasure Trove was sanctioned by the Government of India. This led to the receipt of a considerable number of coins minted by Kings* other than those of the Assam Valley and Hill Tracts; and the formation of the Province of Eastern Bengal and Assam towards the close of 1905 naturally caused the scope of the collection to be enlarged. In the process of cataloguing the coins of the joint collections of the Indian Museum and the Asiatic Society of Bengal, for their recently published catalogue, a large number of duplicates had been discovered, and in response to a request from the Local Government, the Council of the Asiatic Society generously consented to a selection of coins of Muhammadan.

Sovereigns being made from their duplicates for presentation to the Local Cabinet. Thirty-three coins, mainly belonging to the classes found in Part II of this Catalogue, were thus obtained at the beginning of 1909. A striking accession to the class of Assamese coins had previously occurred from a find of nearly 1,000 coins at the Daflating Tea Garden (Sibsagar district) in 1906, and further accessions were obtained by the presentation of a selection of Koch coins by His Highness the Maharaja of Cooch Bihar, and the purchase of a number of Assamese coins through Mr. A. W. Botham, c.s., while he was Deputy Commissioner, Sibsagar.

For the first three years after the collection was begun only a brief manuscript list of the coins was maintained. The present Catalogue (which has been prepared under my supervision by Maulvi Aftabuddin Ahmad, Curator of the Coin Cabinet) is due to the suggestion made by the Government of India in the Home Department Resolution No. 889-903, dated the 30th March 1907, that, in order to avoid the collection of duplicates in any of the Cabinets maintained within the Indian Empire, each Local Government should arrange for the preparation of a Catalogue of coins in their provincial collection. The publication of a Catalogue of the coins in the joint collection in the Indian Museum and the Asiatic Society, Bengal, already referred to, has greatly facilitated the preparation of Catalogues of local collections, and it is hoped that the presen publication will be of considerable use, not only for the purpose for which it was originally intended, but also to all persons who are interested in the history of India.

There are still considerable gaps in the collection, e.g., the Cabinet contains extremely few coins struck by the Muhammadan Governors and Kings of Bengal; but as

regards Assamese coins, the collection is second only to that of the British Museum. The series of coins struck at Jahangirnagar (Dacca) are also of somewhat more than local interest.

Now that the collection has been duly arranged and catalogued, it will be possible for systematic enquiries to be made for coins of provincial interest that are now wanting in the collection. Coins are certainly obtainable in various parts of the Province, and Government has already requested District Officers to purchase any coins of which the Cabinet is in need. Private individuals may also be found who will be willing to present coins in their possession, if they are made aware of the historical value of a properly-selected Cabinet of coins, and of the fact that a Provincial collection exists. The Curator will duly acknowledge such presentations, and a description of all additions, with the names of the donors, will appear in the supplements to the Catalogue that it is proposed to issue from time to time.

H. E. STAPLETON,

Honorary Secretary to the Coin Committee, Eastern Bengal and Assam.

PART I.

ANCIENT, MEDIÆVAL AND CERTAIN MODERN NON-MUHAMMADAN COINS.

INTRODUCTION.

Owing to the recent date of the starting of the Provincial Coin Cabinet (now temporarily accommodated in the Public Library, Shillong), it possesses few ancient or mediæval coins. The first portion of the catalogue in which these are included is subdivided into the following sections:—

Section I.—Punch-marked Coins.

- " II.—Indo-Bactrian and Indo-Greek Coins (c. 250 B.C. to 50 A.D.)
- ,, III.—Coins of the Satrap Nahapan, and his Andhra conqueror Satkarni (c. 126 A.D.)
- The Kushan and Indo-Scythian dynasty from 45 to 220 A.D. (but similar coins continued to be minted for long afterwards, cf. section X).
- , V.—Gupta Coins (320—540 A.D.)
- " VI.—Traikuta King Dahragana (c. 456 A.D.)
- " VII.—Coins of Maukharis.
- ,, VIII.—Sassanian and Indo-Sassanian—(prevalent type in India from sixth to tenth centuries.)
- , IX.—Gadhaiya Currency of Rajputana.
- " X.—Hindu Coinage of Kashmir.
- , XI.—Kings of Ohind (860—950 A.D.)
- " XII.—Gaharwar (Rathor) Dynasty of Kanauj (c. 1080—1193 A.D.)
- "XIII.—The Dynasty of Narwar, near Gwalior (1220—1260 A.D.)
- "XIV.—Kingdom of Vijayanagar (1335— 1565 A.D.)
- "XV.—Pagodas and Fanams of Southern India, including specimens of the coins issued by the Ganga Dynasty of Kalinga (c. 1100 A.D.)

It appears unnecessary in this small publication to enter into a detailed history of each of the classes of coins mentioned above. Brief notes on the principal types are, however, given for the information of readers.

I .- Punch-marked Coins.

It is difficult to trace with any certainty the origin of coinage in India or to ascertain the time when coins began to be employed. It is likely, however, in the first instance, that Indian traders began to feel the necessity of convenient tokens of commercial transactions with foreign merchants and imitate their metallic currency. To begin with, it seems that coinage was a business not of the State but of private persons, such as bankers and merchants. Such a system of private coinage would account for the absence of ruler's names on the earliest coins and this suggestion also supplies a possible reason why no coins are known stamped with the names of such powerful and civilized kings as Asoka (272-232 B.C.) or any other of the ruling chiefs of the Maurya dynasty founded by Chandragupta, the first Emperor of India, in 321 B.C. The final introduction of legends and names of the reigning sovereigns on Indian coins is almost certainly an echo of Greek influence.

Punch-marked coins are supposed to be the earliest currency of India, and to be an imitation of Babylonian issues after the opening of maritime trade between the two countries in the seventh or eighth century B.C. These coins generally consist of flat pieces of metal more or less rectangular in shape, the obverse side being occupied by incused symbols, while the reverse is sometimes blank and sometimes impressed with one or more smaller marks or devices. The weight of the ordinary punchmarked coins corresponds to 32 ratis or 58 grains. After examining a very large number of specimens, Mr. Theobald classified the devices into six heads, viz:—" (1) the human figure; (2) implements, arms and works of man, including the Stupa or Chaitya. bow and arrow, etc.; (3) animals; (4) trees, branches, and fruit: (5) symbol connected with solar, planetary, or Sivite worship;
(6) miscellaneous and unknown".* The punch-marked coins are found in both silver and copper. The latter is regarded by Thomas and V. A. Smith as the older. Vincent Smith (loc. cit.. p. 133) considers that the bar-shaped coins perhaps date from 500 or 600 B.C., but that "in ordinary series of punch-marked coins the earliest place must be assigned to those with blank reverse, at least to those of thin fabric."

Students desirous of studying the subject further may consult V. A. Smith's "Introduction to the collection of Punch-marked Coins" in the Catalogue of Coins in the Indian Museum, section V, pages 130-136 (Oxford, 1906); Rapson's Indian Coins; Cunningham's Coins of Ancient India; Theobald's Notes on some of

^{*} V. A. Smith's Catalogue of Coins in the Indian Museum, p. 131.

the Symbols found on the Punch-marked Coins of Hindustan, J. A. S. B., Vol. LIX, Part I, pp. 181-268, Pls. VIII-X1; Thomas's Ancient Indian Weights (International Numismata Orientalia) and Elliot's Coins of Southern India. Prof. Rapson's Summary in the J. R. A. S. for 1895, p. 869, may also be read.

II .- Indo-Bactrian and Indo-Greek Coins.

In former times Bactria was a rich province, watered by the river Oxus with Zariasupa, or Balkh, as its capital. The Bactrians assimilated the elements of Greek civilization and a line of Bactrian kings began from Diodotos (c. 250 B.C.) who was succeeded by his son Diodotos II. Euthydemos, a native of Magnesia, succeeded Diodotos II, and his son Demetrios conquered a considerable portion of North-Eastern India, comprising Kabul, the Punjab, and Sind (c. 190 B.C.). One Eukratides, taking the advantage of Demetrios's absence, rebelled in Bactria, and subsequently made himself master of it (about 175 B.C.). Although Demetrios retained a hold for some time on his Indian conquests, they finally passed into the hands of Eukratides. While Eukratides was on his way back to his home from India in 156 B.C., he was murdered by his son Apollodotos, some of whose coins are catalogued below. The line of Indo-Bactrian kings soon ended, but Indo-Greek kings continued to rule in Afghanistan and the Indus Valley until 45 A.D., when the last of them, Hermaios, was conquered by the Kushan Turk, Katphises I. The position of these kings as intermediaries between Asia and Europe is shown by their bilingual coinage in Brahmi, or Kharoshti, and Greek (Vide Gardner's British Museum Catalogue; and V. A. Smith's Indian Museum Catalogue, Part I, pp. 3-7).

III .- Coins of Nahapan and Satkarni.

The twenty-two coins catalogued in this section formed part of the notable find made in the Nasik district of the Bombay Presidency in 1906. An exhaustive note on the find by the Reverend H. R. Scott is contained in the Journal of the Bombay Branch of the Royal Asiatic Society for the year 1907. Nahapan was a Kshaharata by clan, which seems to have been a branch of the Sakas. These Sakas are one of the three foreign tribes—the other two being the Pahlavas and Yavanas—who, after being driven from their former homes by the Turki tribes known to the Chinese as Yueh-chi, appear to have made themselves lords of Western India in the first century of the Christian era, although Saka princes had established themselves in the province a hundred years previously. The Sakas correspond to the

Scythians, the Pahlavas were probably Parthians of Persia, and the Yavanas indicate invaders coming from the Indo-Greek kingdoms of Afghanistan. Bhumaka is said to have been the first chief of the Kshaharata tribe who rose to power in Western India at the beginning of the second century A.D., by driving out the Andhras, who for three centuries previously had ruled over Central and Western India. He was succeeded by Nahapan, who extended his dominions by further encroachments on the Andhra possessions. Later, however, in 126 A.D. he was defeated and killed by the Andhras under their king Satkarni Gotamiputra I, and the counter-struck coins Nos. 16-22 are of the latter monarch. Saka Satraps seem, however, to have continued to rule in Western India until it was included by Chandragupta Vikramaditya in his empire about 395 A.D.

IV .- The Kushan or Indo-Scythian dynasty.

In the middle of the first century A.D., Hermaios, the last of the local Greek rulers on the Indian frontier, was subjugated by Kadphisis I., Chief of the Kushan section of the Yueh-chi, or Turki hordes of nomads. This barbarous chieftain at first shared the Kingdom of Kabul with Hermaios, coins being struck in their joint names and the bust and titles of Hermaios in Greek character being retained on the obverse. Various changes in the coinage followed, chiefly suggested by the contemporary Roman coinage of Augustus, but finally the type settled down to one with an Indian bull on the obverse and a Bactrian camel on the reverse. Kadphisis I. was succeeded by his son Wima, known as Kadphisis II. (85-120 A.D.), who "established a gold coinage suggested by the contemporary Roman aurei, with which it agrees in weight. He also issued an extensive copper (bronze) coinage, specimens of which are very common in the whole of North-Western India." (V. A. Smith, Indian Museum Catalogue, p. 63.) His coins are classified into three types, viz., (1) obverse, bust of king; reverse, two-armed Siva; (2) obverse, head of king in frame; reverse, combined trident and battle-axe; and (3) obverse, standing king and altar; reverse, Siva and bull. The first two types are generally found in gold issues and the third in copper pieces of small and large sizes. "The legends which record the royal name and titles, are bilingual, in accordance with Bactrian practice. The obverse legend is inscribed in the Greek language and character, but the language of the reverse legend is a form of Prakrit or Vernacular sanskrit and the character is a form of Kharoshti alphabet, read like Hebrew from right to left." (V.A. Smith, Imperial Gazetteer, Vol. II, p. 139.)

Kadphisis II was succeeded by Kanishka (c. 120-150 A.D.), who, after completing the conquest of Kashmir, waged successful war against China, and is famous as the convener of the last Buddhist Council. He appears to have issued numerous gold and copper coins from mints at Kabul and Peshawar, his capital. His aurei differ from those of his predecessor in design and legend. The legends on both sides are in Greek characters only, but the language in some is Greek and in others old Persian. adopted the standing king and altar type of Kadphisis II on the obverse, while the reverse devices on his coins consist of various Greek and Zoroastrian gods and goddesses on his earlier coins, and Buddha on the later coins. The Kushan empire appears to have broken up about 200 A.D. at the end of or during the reign of Vasudeva, the second Kushan king after Kanishka, but coins bearing Vasudeva's name continued to be struck long after his death. These show signs of influence by the Sassanian coinage of Persia, which began to be produced in c. 226 A.D., and seem to have been issued by the chiefs of States formed out of the fragments of the Kushan empire. Vasudeva adopted the obverse of standing king and altar and the reverse devices of Siva and bull, the legend being corrupted Greek characters. The two coins in the cabinet are of Sita and Sena, who appear to have been chiefs of the l'anjab and the neighbouring countries at some period during the third and fourth centuries A.D. The Kashmir coins of much later date are also degraded copies of Kushan coins.

V.-Gupta Coins (Circa A.D. 320-540).

Little is known of the events that attended the break-up of the Kushan and Andhra dynasties, but in the fourth century we again reach authentic history. Three hundred years before Christ, Pataliputra (Patna) had been famous as the capital of Chandra Gupta Maurya, and 620 years later another king of the same town and name came into prominence. His marriage with the princess Kumara Devi of the Lichchavi clan of Tirhut enabled him to extend his dominions westward to Allahabad. Chandra Gupta I established a new era, commencing from February 26, 320 A.D., the probable date of his coronation, and he also struck coins bearing the image of his queen in the joint name of himself and the Lichchavis. His son, Samudra Gupta, and grandson, Chandra Gupta II. (Vikramaditya, 375-413 A.D.) extended the Gupta empire to the Narbada in the south and to the Arabian Sea in the west. It was not until the end of the long reign of Kumara Gupta I (413-455 A. D.), the son and successor of Chandra Gupta II. that any diminution of the Gupta power was experienced. The first invasion of the White Huns was successfully met by Skanda Gupta, Kumar Gupta's son, and for the first ten years of his reign India had peace. In 465 A.D., however, the Huns again burst through the passes, and by the time of Skanda Gupta's death (c. 480) the Gupta empire had disappeared, and India quickly reverted to the normal condition of petty states.

"The gold coinage of the early Gupta kings was based on that of the Kushans, and ultimately on the Roman money. When Chandra Gupta II annexed Gujarat and Surashtra, he recognised the convenience of the small silver currency of the Satraps, based on the Greek hemidrachmæ, and imitated it closely."—(V. A. Smith, I. M. C., p. 97.) The Gupta coins bear legends in Sanskrit, and are of many types, e.g., king and queen, Asvamedha (struck in commemoration of the "Horse sacrifice" performed by Samudra Gupta), "Lyrist" "Spearman," "Archer," "Goddess on lotus seat," "Elephant rider," "Peacock," etc.

VII.—Coins of the Maukharis.

These coins are of special interest not only as supplying an important link in the morphological pedigree of Indian coins, but also because the collection includes samples of the mintage of Harsha Siladitya, the famous paramount king of India who reigned in Kanauj and Thaneswar in the first half of the seventh century. Hiuen Tsang describes the great assemblies held by Harsha in 644 A.D. at Kanauj and Prayaga (Allahabad) in honour of the Buddhist faith, which are of special provincial interest, owing to the fact that the principal vassal-king who attended was Kumara Bhaskara-Varman, Raja of Kamrupa. The coinage of Harsha Siladitya and his immediate predecessors follows in type the silver coinage of the Guptas, and that of the Western Satraps, e.g., Nahapan, upon which the Gupta coinage was based. Details will be found in a paper by Mr. R. Burn in the J. R. A. S. for 1906, pp. 843-350. Harsha was the son of Prabhakara-Vardhana, who was descended from the Gupta kings, through his mother, Mahasena Gupta.

VIII .- Sassanian and Indo-Sassanian Coins.

The Sassanian dynasty ruled Persia from 226-651 A.D. and a list of its twenty-one kings will be found in V. A. Smith's *Indian Museum Catalogue*, p. 217.

The Sassanian coins are broad and thin, and bear the king's bust, facing right, on the obverse, and a fire-altar with attendants and various accessories on the reverse. The legends were originally in the old Persian language and Pahlavi script, but the latest issues bore additional inscriptions in the Arabic language and Kufic character. The notes on the Muhammadan coins in Part II of this Catalogue may also be read in this connexion. The Sassanian type of coin was adopted both by the White Huns (rulers of Northern India, c. 500 A.D.) and the Muhammadan Governors of Persia at the end of the seventh century, and a barbarous imitation of it was the prevalent type of coin in India in the sixth to tenth centuries (vide next section).

The Shillong Cabinet possesses three silver Persian coins of Khusru II (c. 600 A.D.), and five of unidentified local Indian rulers, based on the Sassanian style.

IX .- The Gadhaiya Coins of Gujarat.

The Gadhaiya coins are degraded copies of the Sassanian type of coin. Mr. G. P. Taylor in his note of this coinage (J. A. S. B., 1904, Numismatic Supplement No. 4, p. 372) considers them to have been issued during the time of Chavada (A.D. 746-942), Chalukya (A.D. 942-1243) and Vaghela (A.D. 1244-1297), kings of Gujarat, and that the coins were copies of imitations of Sassanian coins issued in Marwar and Rajputana by the White Hun king Toraman, the destroyer of the Gupta empire, in the first quarter of the sixth century. Unlike their Sassanian prototypes, which are thin laminæ of silver, the Gadhaiya coins are thick and dumpy, and, owing to degradation the type is often almost unrecognisable. Mr. Taylor (loc. cit.) gives the following account of the origin of their names: "The name of Gadhaiya, or as sometimes pronounced Gadhiya, is said to be derived from the Sanskrit Gardhabiya, 'Asinine'-' of the Ass dynasty.' How so strange a designation came to be attached to the coins is not very evident, but I venture to suggest the following as a possible explanation: For some twenty years after the settlement of the Hunas on the banks of the Oxus, the reigning Sassanian king was Varahran V: (A.D. 419-438), who, from his devotion to the chase, and especially to the chase of the wild ass, gained the nickname of the Varahran Gur, or Bahram, the Ass (hunter). Now, when the coins of this king began to circulate amongst his enemies, the Hunas, these, by a very evident jeu d'esprit, may have dubbed the thin, insignificantlooking silver pieces, 'Ass-money,' a name that would readily 'stick.' Later on, when imitations of the coin of the same

Sassanian type were struck by the Hunas themselves in India, the name would fall to be translated by some Prakrit form of the Sanskrit equivalent Gardhabhiya, and this designation by a process of phonetic degeneration, proceeding pari passu with the more and more degraded workmanship of the coins themselves, finally dwindled down to Gadhaiya, the term in use to-day by the common people."

X .- Hindu Coinage of Kashmir.

XI.—Hindu Kings of Ohind.

The Brahmin kings of Ohind (Waihind) are commonly called the "Hindu Kings of Kabul," but this is erroneous, as at the period (A.D. 860-950) during which they ruled, Kabul was in the hands of the Muhammadans. The Ohind kings belonged to the "Hindu Shahiya" dynasty, founded by the Brahmin minister of Lagaturman, who was probably the king of the Turki, or Kushan, dynasty of Kabul, when this city was occupied by the armies of Islam. The new Shahiya (Shahi) family established itself in the Punjab with its capital at Ohind (Udabhandapura) on the Indus above Atak. Here they reigned until Trilochana Pala, the last representative of the dynasty, was crushed by Mahmud of Ghazni about 1013 A.D. The Spalapati Deva of coins Nos. 1 and 2 of the Shillong collection is identified by Thomas and Cunningham with Kallar, whom Albiruni states to be the founder of the dynasty, but Vincent Smith is inclined to regard Spalapati as identical with Samanta, as both words mean "Military Commander." The commonest type of these coins is the "bull and horseman" (bull on one side and horseman on the other), but "elephant and lion" and "lion and peacock" are also found. Although the family lasted till 1013 A.D., the Deva series terminated about 950 A.D., and rulers with names ending in Pal take their place. The "bull and horseman" type was copied by the Tomara and Chauhan kings of Delhi and Ajmir, the Rajput dynasty mentioned in the next two sections, the Rajas of Kangra and the early Muhammadan Sultans of Delhi.

XII.—Gaharwar (Rathor) Dynasty of Kanauj (c. 1080-1193

The Gaharwar Rajput clan is one of the principal mediæval dynasties of Northern India, the chief kings of the line being Chandra Deva (end of the eleventh century), Madanapala (circa A.D. 1080—1115), Govinda Chandra (A.D. 1112—60), Vijaya Chandra (about A.D. 1160-69), and Jaya Chandra (A.D. 1169-

1193). After the capture of Kanauj in 1193 A.D. by Mu'izzuddin Muhammad Ibn Sam Ghori, the great majority of the clan retreated to Marwar (Rajputana), where their descendants are now known as Rathors. The coins of the Gaharwars are modelled chiefly on the "bull and horseman" type of Ohind, but also follow those of the Chedi dynasty of Central India, i.e., the obverse has the Raja's name in bold characters, and the reverse a rudely-executed image of a goddess sitting cross-legged.

XIII.—The Dynasty of Narwar (1220-1260 A.D.)

Narwar, or Padmavati, a famous city near Gwalior, was originally the capital of Gunapati Naga, one of the kings of Northern India whom Samudra Gupta of the Imperial Gupta dynasty "forcibly rooted up" about 330 A.D. Without proceeding further to trace the history of Narwar, it will suffice to note that before the conquest of Narwar by Balban in 1251 A.D., Chahara Deva, one of the kings whose coins appear in this Catalogue, was described by the contemporary historian Minhajus Siraj as "the greatest of the kings of Hindustan."

XIV .- Kingdom of Vijayanagar.

Some time after 1327 A.D., when Muhammad Ibn Tughlaq was Sultan of Delhi and the whole Dakhan had passed into the hands of the Muhammadan conqueror, the terror-stricken Hindus of the south united under the leadership of two Kanarese brothers -Bukka and Harihara. These two brothers founded the kingdom of Vijayanagar, round the capital city of the same name situated on the Tungabhadara river, a tributary of the Krishna. The kings of this line called themselves by the Kanarese title of Raya, instead of Raja, and the first king Bukka probably began to reign about 1335 A.D. About 1490 A.D. the dynasty founded by the two brothers came to an end, and was replaced by a second dynasty, with Nara Sinha, a usurping minister, as its first king. Again, in 1542, on the death of Achyuta-deva, the weakest king of the second dynasty, the Government passed into the hands of three brothers-Rama, Tiromala, and Venkatadari,-the first-named subsequently coming to the throne. By his arrogance he caused such offence to the Sultans of the five kingdoms into which the Bahmani king lom had split up that they combined together to crush him. Rama Raya was defeated and slain in 1565 at a battle near the capital, which was then sacked "so effectually that it has ever since remained a ruin." For a hundred years more the family of Rana Raya continued to

exercise some sway over the Hindus of the south, but ultimately the territories of Vijayanagar passed into the hands of Aurangzeb. The coinage of the Vijayanagar kingdom, which consisted chiefly of gold, followed the southern types of pagoda and fanam, which will be dealt with in the next section. The Shillong collection includes only three gold specimens of Deva Raya II of the first dynasty, and one of Krishna Deva Raya of the second dynasty.

The history of the Vijayanagar coinage is contained in articles entitled "The Coins of the Kirgs of Vijayanagar" by Professor Hultzsch, Ind. Ant., Vol. XX, 1891, p. 301; ibid, Vol. XXI, p. 321; ibid, Vol. XXIII, p. 24; and Vol. XXV, p. 317. For the history of the dynasty itself, Mr. Sewell's article in Volume II of the Imperial Gazetteer may be consulted, as well as his book "A Forgotten Empire." A discussion of the kings of the three dynasties will also be found in Sir Walter Elliot's Coins of Southern India, p. 93.

XV .- Pagodas and Fanams of Southern India.

Southern India was the refuge and is still the home of the Dravidian races. Unlike the plains of the north, the difficult nature of the country preserved it to a great extent from foreign influence, and this isolation had a marked effect on its coinage. It appears that in the earliest times of which there is any record the ancient punch-marked coins of silver and copper were current in the south. Later on, the southern coinage was principally gold. It is not known when the punch-marked coins ceased to be current, and when or how this gold coinage originated, but the earliest specimens of the gold currency are mere globules of metal. Gradually, these were flattened and became die-struck coins. The larger pieces, subsequently known to the English traders as pagodas, were called by the indigenes, pon, hon, or varaha, while the smaller pieces were known as fanams. A pagoda weighed approximately 52 grains, and was based on the weight of the kalanju seed ("Molucca bean"), while the fanam had one-tenth this weight. A silver coin of the same weight as the fanam was called a chakram, and the copper kasu or "cash" represented in weight multiples of the fanam and are to be regarded as the equivalent of the cowries used in Bengal. This currency continucd in use till 1833.

The Vira Raya fanam catalogued below was a very common type of the series. Sir Walter Elliot remarks (Coins of Southern India, page 146)— "They derive their origin from the rulers of

the small principalities on the Malabar coast, who first rose to eminence on the partition (c. 400 A.D.), of the Kerala (the coast district from Cape Comorin to Goa) amongst whom the Zamorin was conspicuous. In this view, I am supported by Buchanan's Journal, Vol. II, page 310), who states that they were struck at Calicut, the capital of that prince." The symbols and devices found on these fanams are almost unrecognisable. The outline of indistinct curved lines found sometimes on the obverse may be explained as a crude standing figure or as traces of sankha shell.

The capital of the Ganga dynasty of Kalinga, some of whose coins are also included in the collection, was in the Ganjam district, south of Cuttack.

PART II.

COINS OF THE SULTANS OF DEHLI AND THEIR MUHAMMADAN CONTEMPORARIES, OTHER THAN THOSE CATALOGUED IN PART III.

PART II.—SULTANS OF DEHLI AND THEIR MUHAM-MADAN CONTEMPORARIES, OTHER THAN THOSE CATALOGUED IN PART III.

INTRODUCTION.

This part deals with the coins of the earlier Muhammadan dynasties that ruled over India. With the exception of the Muhammadan Governors of Sind and Multan in the first and second centuries of the Hijra, these may be defined as the Sultans of Dehli and their contemporaries. The only contemporary Muhammadan line of rulers, with coins existing in the Cabinet, that is omitted from this part is the series of Governors and Kings in Bengal. The coins of these are dealt with in Part III, together with the coins of other sovereigns who formerly ruled over portions of the existing Province of Eastern Bengal and Assam.

The following are the several sections into which Part II has been divided:—

Section I.—Early Muhammadan Governors of Sind.

- " II.—Sultans of Dehli.
- " III.—Early Muhammadan contemporaries of the Sultans of Dehli.
- " IV.—Bahmanis of Gulbarga.
- .. V.—'Adil Sháhis.
- " VI.—Sharqi Kings of Jaunpur.
- " VII.—Kings of Málwa.
- , VIII.—Kings of Gujarát.

After the death of the Prophet in 632 A.D. the khalifs chiefly devoted their energies to extending their temporal and spiritual dominion to the furthest possible limits. In the earliest days of conquest the Muhammadans were not very anxious to issue coins of their own pattern, but adopted the types which were current in the conquered areas.

A change, however, in this respect occurred about 76 A.H., or 63 years after the death of the Prophet, when Abdul-Malik began to observe strictly the Islamic rule which prohibits the drawing, or representation, of living objects.

On the early coins of the khalifs the legends were pious phrases from the Qurán, and nothing else was given except the date and the mint (on silver issues). Shortly afterwards, the name of the Khalif or Governor began to appear; and subsequently titles and other particulars regarding the Rulers were added, which displaced to a great extent the religious phrases.

Syllogene + 1

Another reason for displacing the latter was the idea that it would be sacrilege to allow infidels to handle coins with such legends. The language used on Musalman coins in India is either Arabic or Persian, but in a few instances Sanskrit and Hindi words also occur. The ornamentation consists chiefly in the arrangement and grouping of letters and inscriptions. Dots in groups or singly, curved lines and sprigs of flowers were also stamped on coins with the evident purpose of improving their appearance.

The Muhammadan coins are specially noteworthy for th honorary and regal titles of the kings and emperors found on them, as well as for the occurrence of poetical legends. Chronograms also occur, besides symbols indicating the places of mintage and the States to which the coins belong. The denominations of the coins are numerous, e.g., Dinar, Káni, Muhur, Rupia, Tankah, Dám, Fulus, etc. Ordinarily, the Hijra date is used on Musalman coins, but after becoming Emperor of India Akbar introduced a new era, called Ilahi, dating from his accession in 963 A.H.

Marketing to the second of the

SECTION I.—EARLY MUHAMMADAN GOVERNORS OF SIND.

After the death of the Prophet, the invasion of India was first attempted by Muhammadans by way of the sea, but it was not pursued, as the second Khalifah 'Umar (634-43 A.D.) was not much in favour of naval expeditions. This was, however, renewed during the Khalifat of Walid (705-15 A.D.) and Muhammad ibn Qásim, son-in-law of Hajjáj, the then Governor of Persia, advanced through Baluchistan and occupied Sind. He subsequently proceeded as far as Multan and the foot of the Himalayas; but in 715 A.D. he was recalled by Sulaiman, brother and successor to Walid, and put to death. The Muhammadans, however, retained their hold on Sind and Multan until at least the middle of the eleventh century, but did not succeed in utilising their position to extend their dominion over the rest of India. It is noteworthy. however, that the only two coins of these early Muhammadan Governors in the Collection are presentations from a find in the district of Ajmir, which seems to point to an extension of authority over the whole of Rajputana.

SECTION II.—SULTANS OF DEHLI.

The most recent summary of the numismatic history of the Sultans of Dehli is that given by Mr. Vincent Smith in the "Imperial Gazetteer" (Vol. II, pages 143-146). As no better account can be given, Mr. Smith's remarks will now be quoted in extenso.

"The first serious Muslim attack on the interior Indian kingdoms was made towards the close of the tenth century by Subuktzin, king of Ghazni, who defeated a formidable confederacy of princes, and established his authority at Peshawar. His more famous son, Mahmul of Ghazni, devoted the greater part of his reign of thirty-two years (A.D. 998-1030) to making plundering raids into India, and has thus some claim to be regarded as an Indian sovereign. He struck coins which are remarkable for possessing a marginal legend in Sanskrit, explanatory of the Arabic inscription (Thomas, page 48). His son Masaud, and his grandson Maudud, also struck coins at the same mint copied from the 'Bull and Horseman' type of the kings of Ohind, and did not hesitate to violate the strict rule of the Koran by placing the images of creatures on their coins. far as is known these are the earliest Muhammadan coins struck in India which bear images (C. C. N. I., page 60). Notwithstanding its defiance of a fundamental rule of religion, the innovation maintained its ground, and the Muhammadan kings of Ghazi and North-Western India continued to use the 'Bull and Horseman' device up to the time of Balban (A.D. 1265).

The real founder of the Musalman dominion in India was Muizz-ud-din Muhammad bin Sam, otherwise known with embarrassing Oriental redundancy as Shahab-ud-din, or Muhammad Ghori (A.D. 1193-1205), His Ghazni coins follow the old style of the khalifas of Baghdad; but his Indian coins, which are extremely numerous, usually exhibit the Ohind device of the 'Bull and Horseman,' and are mostly composed of billon, an alloy of copper and silver, mingled in irregular and widely varying proportions. This exceedingly inconvenient currency, the value of which could only be determined by assay or touch, was borrowed from the contemporary Hindu princes and the prejudices of the conquered Indians were further humoured by the use of bilingual legends and the native scale of weights. Certain gold coins struck by Muhammad bin Sam in the Gangetic valley actually bear the image of the Hindu goddess Lakshmi. Images then disappear from the Muhammadan coinage of India

and are not again seen until the unorthodox Akbar and his son Jahangir ventured to reintroduce them on some limited issues.

Altamsh (Iltitmish), the most notable of the Turkish slave kings of Dehli, who erected the Kuth Minar, kept his mint busy during his reign (A.D. 1210-35), and emitted a copious currency, chiefly in billon, comprising many varieties. His daughter Razia (1265-87), as has been mentioned, was the last sovereign of Dehli to use the 'Bull and Horseman' device. He struck a large number of silver coins of orthodox type, and a few gold pieces in the same style, besides small change in copper and billon.

The next notable reign from the numismatic point of view is that of Alauddin Muhammad Shah (A.D. 1295-1315), the conqueror of the south. His silver, copper and billon coins are extremely abundant, and his gold pieces are not very rare. Some of his gold coins, inferior in purity to the standard coinage, seem to have been manufactured out of the treasure plundered from the Hindu kings of the south.

This able monarch's worthless son, Kutbuddin Mubarak Shah (A.D. 1316-20), introduced an innovation in the Muhammadan series by reverting to the old Hindu square form of coin, which continued to be used from time to time until the reign of Shah Jahan.

Muhammad, son of Tughlak (1324-51 A.D.), one of the strangest figures in history, who was 'learned, merciless, religious, and mad' has been called by Mr. Thomas the 'prince of moneyers.' The title was justly earned by the variety and beauty of his coins, which surpass those of all other Indian sovereigns in the elegance of their Arabic legends. This mad king tried to replenish his treasury by the simple expedient of coining brass in vast quantities and ordaining that it should be accepted as silver. In order to induce his subjects to accept this arrangement, the legends on the coins informed holders that 'truly he who obeys the Sultan Muhammad bin Tughlak, obeys God,' and enjoined upon them the Koranic command to 'obey God and the Prophet, and those in authority.' pious maxims affirming the divine right of kings, even when backed by the power of a cruel despot, failed to compel the acceptance of brass as silver; and a century after the tyrant's death, 'mountains' of the rejected coins piled up in his fort of Tughlakábád testified to the failure of his crude finance (Thomas, p. 247, note).

Muhammad bin Tughlak having gained the throne by parricide, laid great stress upon the recognition of his title by the acknowledged head of the Musulman world—the khalifa of Egypt, who had succeeded to the honours formerly enjoyed by the rulers of Damascus and Baghdad. When his desired recognition was secured in about the middle of his reign, the Indian monarch discontinued the use of his own name on the coinage and substituted that of the Egyptian khalifa. Coins of this class are common.

The coinage of the succeeding kings of the Tughlak and Lodi dynasties offers little of interest. Ibrahim, the last Lodi king, was decisively defeated at Panipat in 1526 by Babar, the founder of the dynasty of the 'Great Moguls.' The coins of Babar followed foreign models.

Sher Shah, the Afghan rival of Babar's son Humayun, is entitled to the honour of establishing the reformed system of currency, which lasted throughout the Moghul period, was maintained by the East India Company down to 1835, and is the basis of the existing British currency. He finally abolished the inconvenient billon coinage of mixed metal, and struck well-executed pieces in gold, silver, and copper, to a fixed standard of both weight and fineness. His silver rupees, which weigh 180 grains, and contain 175 grains of pure silver, being thus practically equal in value to the modern rupee, often have the king's name in Nagari characters in addition to the usual Arabic inscriptions. The coins of the other kings of the struggling Suri dynasty are similar, but much less numerous."

শ্রহণতান মহমদ (in Nagri character). Margins— Top— مبارک الدنیا والدیں Left— ابوا لنظفر Right— १४।		

"The alien intruders on Indian soil, whether kings or generals, who have left numismatic evidence of their presence in and near the dominion of Altamash" are, according to Thomas,* the following:—

- I. Taj-ud-din Yalduz.
- II. Ala-ud-din Muhammad Khawarazmi.
- III. Jalal-ud-din Mankbarnin ibn Ala-ud-din.
- IV. Changiz Khan.
 - V. Saif-ud-din Hasan Qarlagh.
- VI. Uzbeg Pai (another general of Jalal-ud-din).
- VII. Nasir-ud-din Qubacha of Sind.

The Shillong Cabinet has only one billon specimen of Taj-uddin Yalduz's coinage, and one copper specimen minted in the name of Hasan Qarlagh. Yalduz was a favourite slave of Muhammad ibn Sam, and after his death became ruler of Ghazni. From here he was driven eastward in 611 A.H. by Ala-ud-din Khawarazmi and the coin catalogued below is almost certainly from some Indian mint. Saif-ud-din Qarlagh was a general of Jalal-ud-din Mankbarnin, who "was left in charge of the dependencies of Ghor and Ghazni by that monarch on his departure from India en route for I'raq in A.H. 620." He was ultimately in 636 A.H. driven by the Mongols into Sind, and met his death in that year while besieging Multan. He was thus a contemporary of Queen Raziya.

mirah.	ranwala district
	(A. S. B.'s letter
	No. 720, dated
	the 15th Febru-
	ary 1907).

The Dehli Emperors conquered the mediæval Hindu kingdoms of the Deccan by a succession of expeditions between 1294 and 1322, but they were unable to exercise any permanent control over the south. At the end of the reign of Muhammad ibn Tughlag, a general named Hasan Gangu revolted and founded an independent king lom, which lasted, in name at least, until 1525 A.D. "Either from his having once been in the service of a Brahman, or because he claimed descent from the Sasanid ruler Bah nan, son of Ispandyar, Hasan bore the appellation of Bahman Shah; and by the epithet Bahmani, derived therefrom, the kings of his house are known." (1) The capital of the Bahmani kings was at first Gulbarga (the Ahsanabad of the coins: in the west of the present Hyderabad State), but later was moved to the adjacent town of Bidar, or Muhammadabad. The kingdom reached its fullest extent during the prosperous reign of Muhammad Shah III, and then included practically the whole of the Deccan, save for Khandesh in the west and the Hindu kingdom of Vijavnagar in the south. After this king's death in 1482 gradual distribution of the Bahmani dominions occurred, and before 1512 five kingdoms had sprung out of its ruins.

The Bahmani coinage consisted of gold, silver and copper-The coins are circular in size, and are interesting as displaying various new titles of a religious character. The gold and silver issues vary in weight from 164 to 195 grains, but some fractional silver pieces were also struck by the first two kings, apparently ath of a tankah. In type, the coins follow generally the Dehli coinage.

104 SECTION V.—'ADIL SHAHI DYNASTY OF BIJAPUR.

The five dynasties that rose in the south out of the Bahmani kings were (1) the Adil Shahis of Bijapur, 1490-1686 A.D., (2) the Nizam Shahis of Ahmadnagar, 1490-1637 A.D., (3) Qutb Shahis of Golconda (Hyderabad), 1512-1687 A.D., (4) Imad Shahis of Ellichpur, 1484-1575 A.D., and (5) Barid Shahis of Bidar, 1492-1609 A.D., (Irvine op cit.) The Shillong Collection only possesses specimens of the curious rod coins (Larins) of the Adil Shahi dynasty.

Codrington writes as follows regarding these coins:—

"The curious wire coins called Larin from Lar, a Persian district at the head of the Persian Gulf, where they were produced, were between 200 and 300 years ago the chief currency of the traffic between the Western India coast and that Gulf, so much so that they became a standard of value in the Konkan and Dekkan, and were made there also, the Adil Shah dynasty of Bijapur adopting the pattern."—Musalman Numismatics, page 118.

Sir Walter Elliot, in his "Coins of Southern India," page 138, also notes that *Larins* were long the currency of the Maldive Islands, and though the coins there are now of the ordinary form, the name *Lari* is still retained.

From a mention in Ferishta (Brigg's Translation, Volume III, page 123) of one Kishwar Khan Lary, an adviser! of 'Ali 'Adil Shah, it appears likely that he was the man who induced the Sultan to imitate the hook money of the former's native country.

In 1394 A.D. Mahmud Shah, II, Tughlaq appointed a favorite eunuch called Malik Sarwar, otherwise known as Khwaja Jahan, to be the Governor of the Eastern Provinces with his head quarters at Jaunpur, a city on the Gumti, which had been founded 40 years previously by Feruz Shah, III. Khwajan Jahan before his death in 1399 A.D. asserted his independence of Dehli by assuming the title of Sultan-ash-Sharq, King of the East). dynasty thus founded by him passed to his adopted son Mubarak, and subsequently to the latter's brother, the famous Ibrahim Shah (1400-1440). The dynasty ended with Husain Shah, who was deposed by the Dehli monarch Bahlul Lodi in 1476. He fled to Bengal in 1493 A.D., and is said to have died there in 905 A.H. (1499). Coins bearing his name were, however, minted as late as 910 A.H. (1504 A.D.), and the only Jaunpur coin in the collection is a copper specimen of this date. These coins were probably issued benami by Husain Shah of Bengal or one of his Governors. The Sharqi coinage was of gold, silver, billon, and copper, and generally followed the Dehli model.

ابن ابراهیم شاه
سلطانی خلد[ت]

Husain Shah ibn Muhammad Shah ibn Ibrahim Shah Sultani khaladat. Found in Kotar, a village of Ragurajnagar Tahsil in the Rewa State (letter No. 2361-73C—160 of 1908, dated 23rd December 1908, from the First Assistant to the Governor General in Central India).

Malwa is an ancient kingdom lying to the north of the Vindhya Range. It was originally under the rule of the Ponwars. who were related to the ancient Moris, a branch of the Maurivas. and about 390 A.D. Chandra Gupta, II, annexed it to the Gupta Empire. In 1305 A.D. Malwa was included in the Dehli Empire by Alauddin Khalji. In 1401 Dilawar Khan Ghori, who had previously served as Governor of the Province under the Dehli Emperors, threw off the imperial voke and established his capital at Dhar. Malwa continued under its own rulers till 1531, when it was captured by Bahadur Shah, King of Gujarat. The province was finally annexed to the Mughul empire by Akbar in 1570. Mr. Nelson Wright in the Indian Museum Catalogue states that all the first seven kings of Malwa, except Dilawar Khan, struck coins in gold, silver, and copper. Muhammad II, Bahadur Shah, and Baz Bahadur seem only to have issued copper coins. The remaining rulers do not appear to have minted any coins in their own name. Shadiabad (Mandu) is the only mint town recorded on the Malwa coins, prior to those of Nasir Shah, and the name is then replaced by what appear to be mint-marks. Both circular and square, or rectangular coins are known. They are of fine execution, and hear very legible inscriptions.

Gujarat, which was one of the earliest conquests of Muizzuddin Ibn Sam, became independent of Dehli at about the same time as Malwa, and continued so until it was conquered by Akbar in 980 A.H. (1572 A.D.). Ahmad I, the grandson and successor of Zafar Khan, the Governor, who was compelled against his will to assume kingly power, appears to have been the first to strike coins of the Gujarat series. This king was the founder of the city of Ahmadabad. Gujarat kingdom reached its fullest extent during the reign of Mahmud I (1458-1511). He "reduced the forts of Ginnar in Kathiawar and Champanir near Baroda, and founded in their place the towns of Mustafabad and Muhammadabad, in which he established mints." With few exceptions the Gujarat coins are round in shape, the obverse containing the titles of the Sultans and the reverse their proper name sometimes accompanied by their father's name as well.

السلطان ۹۷۸ مظفرشاه As Sultan 978 A.H.(=1570 A.D.) Muzaffar Shah.	From General Dod- son's Collection; received by ex- change through Mr. Stapleton— probably ulti- mately from Junagarh (West- ern Gujarat).

PART III.

COINS OF NORTH-EASTERN INDIA—BENGAL, ASSAM, MANIPUR, ETC.

COINS OF NORTH-EASTERN INDIA, BENGAL, ASSAM, MANIPUR, ETc.

INTRODUCTION.

The coins catalogued in this Part are the most interesting ones in the collection, as they were struck by sovereigns of the old, kingdoms, comprised in the existing Province of Eastern Bengal and Assam. It is regrettable that the Shillong Cabinet possesses so few Bengal coins, and has no specimens at all of the coins issued by the Hill Tippera State. The collection is comparatively rich in respect of Ahom coins, though there are still many gaps in the series to be filled up, especially as regards gold coins and coins in the Ahom character. A few coins of Nepal are also catalogued in this Part, in view of the relation which this Hill Kingdom had in earlier days with the independent Kingdom and Subahdari of Bengal.

Part III is divided into the following six sections:-

"I .- The Coinage of Bengal.

II.—The Coinage of Assam.

III. - Koch Coins.

IV .- Jaintia Coins.

V .- Manipur Coins.

VI.—Nepalese Coins.

In the year 1198-99 Bengal was invaded and conquered by Muhammad Bakhtiyar Khilji,* one of the generals of Qutbud-din Aibak, who was Viceroy of Dehli on behalf of Muhammad of Ghor. Bakhtiyar Khilji expelled the Hindu Sen dynasty, but retained the metropolis at Lakhnauti (Gaur), where it remained for more than three centuries. Bakhtiyar Khilji appears to have found the quasi-indigenous courie current in Bengal sufficient for the ordinary wants of trade, and hence he did not issue any coins either in his own name or in that of Qutb-ud-din. Ghiyasud-din Iwaz (No. 4), who ruled from 1211 till 1226 A.D., seems to have been the earliest ruler of Bengal to strike coins, but it is to be regretted that they do not bear the name of any mint. name Lakhnauti probably appears first on coins issued in the name of Queen Raziya of Dehli. The province of Bengal was split up about 1325 A.D. into two parts,-Western and Lastern Bengal,—the seats of Government being respectively Lakhnauti and Sonargaon, 15 miles east of the present Dacca. rate governors were appointed, and coins began to be struck at both places as well as at Satgaon, the modern Hugli. In 1353 A.D. Ilyas Shah became independent King of all Bengal, and removed the headquarters of Government to Pandua, 20 miles distant from Gaur, and 12 miles north-east of the modern town of Malda. The Court name of Pandua (Firuzabad) during this period made its appearance on the coins to the total exclusion of Lakhnauti. The name of Sonargaon also disappeared from the coin in the time of 'Azam Shāh (No. 21, 1389-96), and Muazzamabad, a mint probably situated in Mymensingh, appeared instead. Pandua remained the seat of Government during the reign of five successive monarchs, after which Gaur again became the capital. The mint names Husainabad, Nasratabad, Barbakabad, Muhammadabad, and Mahmudabad (places called after various Sultans) refer in all probability to this town. Other names that occur are Fathabad (the modern Faridpur), Chatgaon (Chittagong), and Khalifatabad (near Bagherhat in the Khulna district). From a numismatic point of view the culminating period is reached in the numerous issues of the kings of the Husaini dynasty, -Ala-ud-din Husain, Nasir-ud-din Nasrat, and Ghiyas-ud-din Mahmud, -though the subsequent Suri kings produced better samples of mintage.

In 1572 AD. the Afghan Daud Kararani (No. 56) chose Tanda, an ancient town in the district of Malda, for his headquarters, and established a mint there. After the final annexation of the province by the Mughals, Governors of Bengal were again appointed, and in 1595 Man Simha, Akbar's

Rajput general, selected Rajmahal (Akbarnagar) to be the capital of the Province. It was subsequently, however, deserted in favour of Dacca (Jahāngĭrnagar), the seat of Government being removed there in 1608 A.D. by the Mughal Governor Islam Khan. With the exception of a short period, Dacca remained the capital of the province during the whole of the seventeenth century. Its downfall began in 1704, when Murshid Quli Khan transferred the Nazim's (Governor's) headquarters to Murshidabād. Dacca then became the seat of a Naib Nazim (Deputy Governor) and continued to be so till the year 1843, when the last Naib Nazim, Ghazi-ud-din Haidar, died childless, and the family ceased to exist. After the lapse of 200 years, Dacca has now once more regained the proud position of a capital by the formation of the province of Eastern Bengal and Assam in October 1905.

Khan Bahādur Saiyid Aulad Hasan in his "Notes on the Antiquities of Dacca ' (page 17) states that the Dacca mint was in the old fort on the site now occupied by the Central Jail and the Lunatic Asylum. This fort is said to have been built about the year 1620 A.D. At an earlier date the mint was perhaps somewhere in Islampur, the place where Nawab Islam Khan is supposed to have resided. Coins of all the Mughal Emperors, beginning from Jahangir and down to Shah 'Alam II, were struck at the Dacca mint. On acquiring the Zamindari of Calcutta in 1698, the East India Company was first granted the privilege of having their bullion coined at the mints of the Nawab of Bengal, which were at Patna, Dacca, and Murshidahad.* After the recapture of Calcutta by the Company, in the beginning of 1757, the right to establish a mint of their own was one of the stipulations in the treaty with Siraj-ud-daulah, dated the 7th February of the same year. On the 12th August 1765 the Emperor Shah 'Alam II granted to the Company the "Diwani of the Provinces of Bengal, Bihar, and Orissa." Soon after the commencement of the Company's administration, the mints at Dacca, Patna, and Murshidabad were closed, and that at Calcutta remained the only mint for the province.

As already noted, the Shillong Cabinet is very poor in the coins of Bengal Kings, but a reference to the Mughal section will show that it possesses a fair number of samples of coins minted at Dacca. The one dated 1608 A.D., when Dacca first became the capital of Bengal, is specially noticeable.

^{* &}quot;History of the Coinige of the Te riter'es of the Eat India Company in the Indian Peninsula," by E. Thu s on, page 32.

The founders of the Assamese Kingdom were Shans, who in 1228 A.D., under the leadership of Sukapha, crossed the Patkoi range, which bounds the Brahmaputra Valley at the extreme east, and settled in the neighbourhood of the modern Sibsagar. For about 300 years they remained a unit among the several tribes that then inhabited the Brahmaputra Valley, but about 1530 A.D., under the leadership of Suhunmun, they succeeded in finally conquering their principal rivals, the Chutiyas and Kacharis, and were brought into intimate contact with the world outside the Assam Valley by an unsuccessful invasion of the Muhammadans, who then ruled over Eastern Bengal. Their success evidently inspired them to imitate the coinage of the Muhammadan Kings of the Husaini dynasty, and in 1543 the first Ahom coin was issued by Suklehmun, the son of Suhuhmun. This coin has an inscription in the Ahom language and script, and following a statement made in the Yogini Tantra that the Ahom country was octagonal, the coins are octagonal instead of round; but in other respects they follow closely coins of Nasrat Shah and Ghyasuddin, two of Ala-ud-din Husain Shah's sons. These Ahom coins seem to have been mainly struck in connexion with the installation ceremony of the Ahom Kings, and very few of them are known. At some subsequent date an annual issue of coins in Bengali script began (vide Chakradhvaja's coin in the Cabinet, dated 1585 Saka=1633 A.D.), but until the time of Rudra Simha, 1696-1714 A.D., there does not appear to have been any regular issue of coins. Commencing, however, from 1618 Saka, specimens of Assamese coinage in Bengali script are known for nearly every year un'il the end of Assamese rule about 1742 Saka (=1820 A.D.). Most of the coins have the same inscription, the obverse mentioning the name of the king and the date of the coin, while the reverse contains an invocation to gods and goldesses of the Hindu Pantheon. The most interesting coins of the series are those minted in the name of Siva Simha and Rajesvara Simha. The former king permitted his wives to strike coins on his behalf, and in 1651 Saka his queen Pramathesvari for the first time broke away from the Assamese tradition by striking at Garhgaon a square coin in Persian script. The shape of this coin was probably derived from the square Manipuri coins, issued shortly before by Chairomba. Rajesvara experimented in new forms of coinage almost throughout all his Besides ordinary octagonal coins in Bengali script, he struck in the first year of his reign cctagonal coins in Ahom script (vide coin at bottom of Plate I) and square coins in Bengali script were also issued. Besides these, he issued octagonal coins with a Nagri inscription in 1675 Saka and at least two issues of coins in Persian were also struck,—a square issue in 1674 Saka and an octagonal issue in 1685. On both the latter coins the name of the mint, Rangpur, is mentioned.

Towards the end of Assamese rule, the Vaishnava section of the inhabitants of Assam constantly broke cut into rebellion against their kings, who were followers of Siva. In the time of Gaurinatha Simha two Vaishnava usurpers began to strike coins in Upper Assam, and the Assamese Kingdom was only saved from immediate dissolution by the temporary intervention of the British in 1794 A.D. Owing to the adoption of a policy of nonintervention, the British soon withdrew, and for nearly 30 years anarchy prevailed. Towards the end of this period, invasions of Burmese occurred, and the last King of Assam, Jogesvara Simha was a puppet of the Burmese Governors. The Burmese appear to have minted an octagonal silver coinage of their own called Gahuri Muhurs, with a pig on one side and a floral design, or rude inscription, on the other; but these coins are very rare, and the Shillong Cabinet contains no specimen of them. The last dated coins are those of Chandra Kanta (the predecessor of Jogesvara) minted in Saka 1741 and 1742 (=1319 and 1820 A.D.). The aggressions of the Burmese finally led to a British expedition for the purpose of ejecting them from Assam and Manipur. Rangpur was occupied at the beginning of 1825 A.D., and by the treaty of Yandabo, signed on February the 24th, 1826, the Burmese King undertook to have no further dealings with Assam. Owing to the atrocities perpetrated by the Burmese, Assam had fallen into a most deplorable condition, and the administration of the country was entirely conducted for several years after the treaty by British officials. An attempt to reinstate Purandara Simha, who had previously reigned for a short time in 1818 A.D., ended in failure, and from 1838 Assam has formed an integral part of British India. No coins of Purandara Simha have yet come to light.*

^{*} Further details of Assamese coinage may be found in two papers read by Mr. Stapleton before the Asiatic Society of Bengal in 1909 and 1910: as well as in a paper by Mr. J. Allan in the Numismatic Chronicle for 1909 (Volume IX).

(1) Sri Sri, but gauri spelt as গৌরি instead of গৌরী	Ditto	Pl. II, No. 13.	

The progenitor of the Koch Kings is said to have been a Mech or Koch, named Haria Mandal, a resident of Chikangram in the district of Goalpara. He married the two daughters of one Haju. Hira and Jira by name, by whom he had two sons. Bisu was the son of the former and Sisu of the latter. The Muhammadans under Husain Shāh conquered Kamata (the former name of Kuch Bihar) about 1493, but retained no permanent hold on the country. After their departure it was divided amongst numerous petty chiefs, of whom Bisu was one. Ultimately, about 1515 A.D., Bisu succeeded in conquering his neighbours. and, being then converted to Hinduism, he assumed the name of Bisva Simha, and removed his capital from kangram to the present site of Kuch Bihar. He died about 1540 A.D. "At the time of Bisva Singh's death, his two eldest sons, Malla Deva and Sukladhvaj, were away at Benares, and their brother Nara Simha, taking advantage of their absence, proclaimed himself king." As soon as the news reached Malla Deva and Sukladhvaj, they hastened home and defeated Nara Simha. who fled to Nepal and finally Kashmir. Malla Deva then ascended the throne with the name of Nara Narayana, Sukladhvaj (nicknamed Silarai, King of the Kites, from his rapidity of movement in warfare) being appointed his Commander-in-Chief.

The Koch power reached its zenith during the reign of Nara Narayana, and his conquests are said to have extended over the whole of the Assam Valley, the Khasi and Jaintia Hills, Manipur, Tippera, and part of Sylhet. When Viryavanta, the chief of the Khairam State in the Khasi Hills, tendered his submission voluntarily, the *Buranjis* state that a condition imposed on him was that his coins should in future be struck in the name of Nara Narayana, with the sign of a mace as a distinguishing mark from those of the Koch Kings' own mint. Specimens of these latter coins, however, have not yet been found, and the Khasi Chiefs have no record that their predecessors ever struck coins of their own.

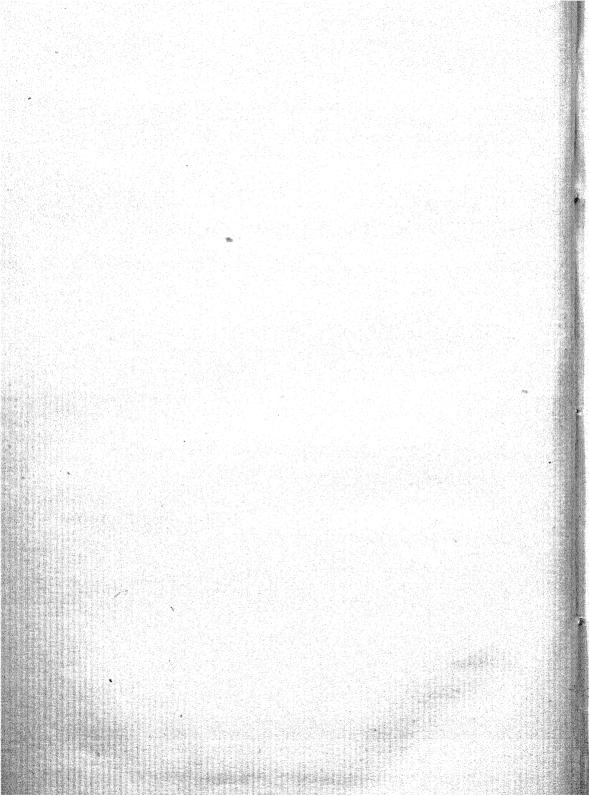

Silarai died, leaving a son named Raghu Deva. Owing to a misunderstanding between him and his uncle, Nara Narayana, the kingdom was afterwards divided between them, the portion west of the Sankosh River being kept by Nara Narayana for himself and his successors, while the tract east of that river was allotted to Raghu Deva. The western kingdom was subsequently called Kuch Bihar. A short history of this State will be found in Volume I of Aitchison's Treaties, pages 99-102. The rule of the

THE COINAGE OF THE KOCH KINGS.

eastern kingdom ended with Bali Narayan's death in 1637, and his successors were gradually reduced to the status of zamindars. The present Bijni and Beltala zamindars are their representatives. Coins of the western kingdom are extant, examples being found in this Cabinet (vide also Mr. Stapleton's paper in J.A.S.B., for 1909); but of the eastern kingdom only two coins of Raghu Deva, dated 1510 Saka (1588 A.D.), are known.

Unlike the coinage of the Ahoms, the Koch coins, as far as have come to light, are circular.* The legends in the former are well executed, while those in the full coins of the latter are poor in this respect. The half coins are peculiar as being apparently manufactured by stamping out the centre of a full coin.

In a few instances catalogued below also oval.

HALF COINS—continued.			
(1) Sri Sri (2) Siva Chara (8) Kamala Ma.	Same as that of previous one.	As there are two kings, viz., Devendra and Sivendra, whose names end with the letters 'vendra' (432) it is difficult to identify the coin with certainty.	
(1) Traces of Sri (2) va Chara (3) ma mala.	Ditto	In this coin the letter preceding of seems to be 3, and therefore it must be a coin of either Darendra Narayana or Harendra Narayana (cf. Pl. XXIV. No. 7, J. A. S. B., Part I, No. 3, 1895).	
(1) Traces of Sri (2) va Chara (3) ma mala.	Presented in 1906 by Mr. F. E. Jackson, Deputy Commis- sioner, Khasi and Jaintia Hills.	Pl. IV, No. 4.	

The past history of the Jaintia State, which included the Jaintia Hills and a tract of Plains country, called Jaintiapur (the modern Jaintia Parganas), is almost a blank. The tribes inhabiting the hills are called Syntengs. It is not known why the Syntengs-unlike their neighbours, the Khasis, who still preserve their democratic form of Government-united under one ruler, or the reasons which induced the Rajas to leave the hills and settle down in the plains at Jaintiapur. The Jaintia State had a mint at an early date; but it is difficult to say when and by whom this mint was first established. It is, however, known from the Assam Buranjis that a few years before 1555 A.D. the Koch King Nara Narayan defeated and killed the Raja of Jaintia, and imposed a condition on the son of the vanquished sovereign to the effect that in future coins should not be issued in his own name, but his capital should only be mentioned. It is due to this that the coins catalogued below do not bear the name of the King during whose time they were minted. Having possessions in the Plains, the early Jaintia Rajas seem to have learnt the art of coining from the Muhammadan Kings of Bengal, who had exercised sovereignty over Sylhet since the beginning of the fourteenth century. This is to some extent confirmed by the fact that the Jaintia coins were—similar to those of 'Ala-ud-din Husain Shah (1493-1522 A.D.) and his sons Nasir-ud-din and Ghyas-ud-dincircular with double marginal circles and dots between. The coins struck after the subjugation of the Rajas by the Koch King bear legends similar to those of the Ahom and Koch coinages. No earlier coins are forthcoming to show whether Jaintia rupees contained inscriptions in any other language and script.

The coins were locally known as Katra taka (sword rupees) from the fact that they bore the device of a sword on them. Mr. Gait writes in the Journal of the Asiatic Society, Bengal (Vol. LXIV, Part I, 1895, page 243), "they were made of debased metal, which was doubtless a result of the system under which the right to mint coin was sold by auction to the highest bidder." Two coins bearing date 1712 Saka were sent in 1836 A.D. to the Assay Master, Calcutta, for analysis, and were found to contain respectively:—

Silver	6	8 parts.	1	Silver	111	87.5 parls
Copper	12			Copper		116.9 ,,
Zinc	4	7,,		Zinc	•••	88.6 "
Other metals	J	2 ,,		Other me	etals	2·0 "
m , 1		_				040.44
Total	24	⊎ ",		Totl	131	240.0"

It would seem, however, from the appearance of the earlier coins, as compared with those subsequent to 1700, that the process of debasement only began about the latter date. Quarter coins are also recorded by Mr. Gait.

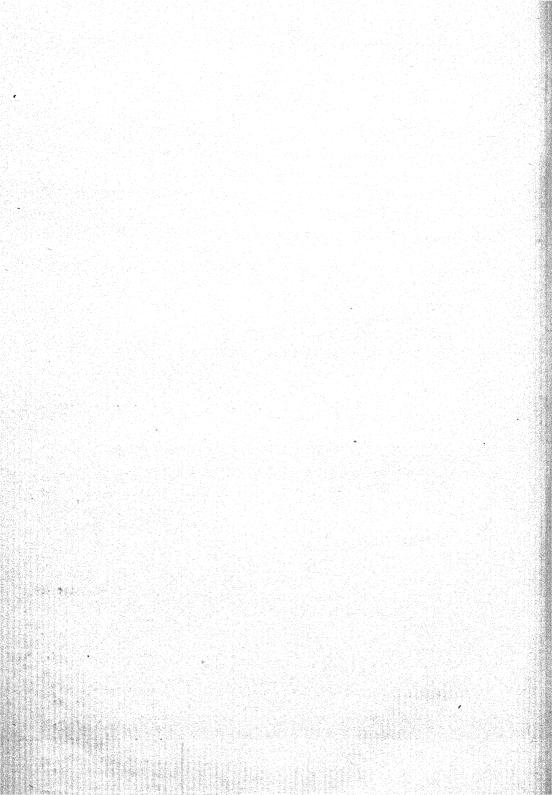

The use of money as a means of exchange was probably not very extensive. All rents were paid in kind; the labourer mostly satisfied the demand against him with labour, and even down to 1775 the Government taxes were paid in cowries.

SANSKRIT LANGUAGE AND	OLDBENGALIS	CRIPT.
Four-line legend in circle with broad dotted margin, (1) Sri Sri Si (2) va Charana Ka (3) mala Madhu ka (4) rasya;— "[Coin] of the Purandara [=Indra] of Jayantapura, a bee on the lotus of the feet of Siva, Saka 1592" [=1670 A.D.] Crescent at the top of margin five-pointed star (Solomon's Seal) at end of legend; sword to right and gun to left of the legend. Ditto, and two flowers formed of four dots, having a trefoil between them above the first line of the legend. Two daggers near margin of left of gun and right of sword respectively.	through the Deputy Commissioner, Kámrúp. Purchased in 1905 through the Deputy Commissioner, Kámrúp.	R.f. J. A. S. B., Part I, 1895, Pl. XXIV, 9. Probably a coin of Pritapa Simba, whose date of accession is 1669 and death 1678 A.D. (vide Mr. Gart's History of Assam, page 360). Pl. IV, No. 2 of this cataloque. Ref. J. A. S. B., Part I, No. 3, 1895, Pl. XXIV, 15. This coin is probably of Bijayaj'an who reigned from 1780-90 A.D. (page 360 of Mr. Gait History).
Ditto	Ditto.	
Ditto	Purchased in 1909 through the Deputy Commis- sioner, Sibságar.	Date 1853-S. Apparently of Samwat era (= 1796 A.D.) This was in reign of Ram Simha II. From the style of the Bengali character used in inscription, the coin appears to be a recent one.

Mackenzie writes as follows in his North-East Frontier (page 1491).—"The early history of Manipur was barbarous in the extreme. It was not only marked by constant raids of the Manipuris into Burma and of the Burmese into Manipur. but by internal wars of the most savage and revolting type, in which sons murdered fathers, and brothers murdered brothers, without a single trait of heroism to relieve the dark scene of blood and treachery." The modern history of the State begins from the time (1709 A.D.?) when Pamheiba (or Gharib Niwaz. as he was called subsequently) shot his adopted father and occupied the throne. The records of Manipur contain a list of chiefs going back to the first century of the Christian era, but many of these earlier chiefs are probably entirely legendary. Their names have, however, been given in the foregoing three pages for the information of the readers. It is needless to enter into further details of Manipur history, as information can easily be had by reference to recent publications on the subject, e.g., the District Gazetteer of Manipur, etc.

The Shillong Cabinet has been singularly unfortunate as regards Manipur coins, as two collections have been lost in transit. The few coins catalogued below belong to the series locally known as Sel or "Shell" coins, and are composed of bell-metal, obtained chiefly from Burma. They are small in size, weighing 8 to 18 grains, and varying in market value from 400 to 450 to a British rupee. The process of mintage consisted in the metal being first cast in little pellets, which were then softened by fire. The pellets were next flattened by a blow of the hammer into an irregularly round figure, and stamped by a punch with a letter cut on it (said to be the initial letter of the regnant king's name). There is no evidence of there having been at alny itme a gold coinage in existence; but Prinsep states that a square silver coinage existed from at least 1712 A.D. A square coin of Chaurjit dated 1734 Saka, which is in the possession of Mr. Stapleton, weighs 173 grains. About seven years prior to 873 A.D. an attempt was made by the then Political A out to introduce the ordinary Indian copper coinage, and a large number of pice were supplied by Government. The experiment, however, resulted in total failure, as the women in the bazars refused to accept them. Since the British expedition of 1891, however, the indigenous coinage has ceased to be current except in the more out-of-the-way parts of the State, the ordinary English coins of silver and copper being used instead. Square copper coins of larger size and of greater weight are also known to have been in use in Manipur, but nothing definite regarding them can be ascertained.

A full account of the coinage of Nepal will be found in Mr. E. H. Walsh's paper (J. R. A. S., 1908, pages 669-759). As noted by him, the coinage falls into three well-marked groups. The first is the copper coins of two contemporary dynasties, one of Licchavi kings (cf. the section on Gupta coins in Part I), and the other of Thakuri kings, who ruled in the Nepal Valley from **c.** 400—800. This was based on a type of Kusham coins. The second group is that of "the Malla dynasty of Newar kings which commenced with the conquest of the country by Jayasthiti Malla in 1380 A.D., and whose silver coinage commenced in 1566 A.D. and continued until the Gorkha conquest." During the latter part of this period Nepal was divided into three kingdoms,—Bhatgaon, Kathamandu, and Patan or Lalitapur. The third period is that of the regnant Gurkha dynasty founded by Prithvi Narayana Saha in 1768 A.D. It is not known why the coinage was suspended in the middle ages, in spite of Nepal having become independent of Tibet in 879 A.D., but the revival of minting was apparently due to a visit of Mahendra Malla, the Kathamandu king, to Akbar, who is said to have given him permission to strike coins called muhars of the weight of 6 mashas (=87.6 grains). This king was also the first to supply Tibet with coinage, and appears to have taken the coins of Ghiyas-ud-din Mahmud of Bengal as models. Later kings imitated a variety of the coinage of Jahangir.

The Shillong coin cabinet possesses no specimens of the first two groups of coins and only two of the Gurkha coins. The Gurkhas claim descent from the Rajputs of Chitor. After the conquest of Chitor by 'Alla-ud-din in 1289 A.D. their ancestor is said to have migrated to the Himalayas and settled at Noakot. Subsequently, about 1560, they obtained the sovereignty of Gurkha, forty miles west of Kathmandu and took their name from the conquered territory. The "Gorkha kings all bear the title of Saha Deva. The title of Saha (Shah) is said to have been conferred by the Emperor of Dehli on Jagdeva Khan, the forty-first king of the Gorkha dynasty, for some service that he rendered to the Emperor, and has been borne by all his successors." The Gurkha kings struck coins in all the three metals-gold, silver, and copper. Their coins are dated in the Saka and recently the Samvat era. They bear the symbols of the Sun and Moon, stupa, chakra, paduka (foot-prints of Vishnu), crossed kukris (the national Gurkha weapon), and the names of the deities Gurakhanatha, Lokanatha, Guhyeswari, and Bhavani.

PART IV.

MUGHAL EMPERORS OF INDIA, AND THEIR CONTEMPORARIES (OTHER THAN THOSE DEALT WITH IN PART III).

MUGHAL EMPERORS OF INDIA, AND THEIR CONTEMPORARIES (OTHER THAN THOSE DEALT WITH IN PART III).

This part of the Catalogue deals with the issues of the Mughal Emperors of India, together with a few coins of the East India Company, and of the Native States which were permitted to spring up out of the ruins of the Delhi Empire under the successors of Aurangzeb. It comprises ten sections, viz.:—

I—The Mughal Emperors of Delhi.

II-The earlier Rulers of Haidarabad.

III—The East India Company.

IV-Haidarabad (present dynasty).

V-Baroda.

VI-Ujjain.

VII-Gwalior.

VIII-Jaipur.

IX-Native States (unassigned coins).

X-The coins of the Sikhs.

Sections II—X do not call for any special description, but explanatory notes will be found in the remarks column against any coins that require particular notice. The history of the coinage of the East India Company will be found in Mr. Stanley Lane-Poole's notes in the Catalogue of Indian Coins (Mughal Emperors) in the British Museum, Mr. E. Thurston's History of the coinage of the territories of the East India Company in the Indian Peninsula, and a note by the latter author in the J. A. S. B. for 1893. For the currencies of the Native States the following may be consulted: Webb, Currencies of the Hindu States of Rajputana (1893); Temple, Coins of the Modern Native Chiefs of the Punjab (Indian Antiquary, 1889); Rodgers, Coins of the Sikhs (J. A. S. B., 1881); and Hærnle, Notes on coins of Native States (J. A. S. B., 1897).

Introduction.

Mughal rule in India began with Zahiruddin Muhammad Bábar, ruler of Kabul and Kandahar and grandson of Abu Sa'id. seventh Khan of Transoxiana. Bábar invaded India in 1526. and at a battle fought on the memorable field of Panipat, Ibrahim, the last representative of the House of Lodi, was slain. and the kingdom of Dehli passed into the hands of the Mughals. As noticed in the earlier part of this catalogue, Bábar preserved the character of the Transoxian currency in his Indian silver coinage, which consisted of broad thin silver pieces of about 75 grains in weight. They bear his name and titles in a circular or looped area, with the date sometimes in the body and sometimes on the margin. The latter also generally contains the name of the mint. The title of the (Kháqán), Bábar employed, on his coins which meant "Emperor of China" (or Chinese Tartary). This he did apparently to show his descent from Taimur the Lame. His copper coins, which were of similar weight to those of his Indian predecessors, had no king's name, one side being occupied by the name of the mint and the other by the date.

The coinage of Humáyún, Bábar's son and successor, was similar to that of his father, except that he also struck small gold coins varying in weight from 9 to 16 grains, and during his expedition to Bengal against the Afghan Sher Khan in 1539 A.D. he appears to have struck silver coins modelled on Bengal weights (vide I.M.C., Vol. III, Nos. 21-22). Sher Khan, who had been a general of the kingdom of Jaunpur, ultimately managed to drive Humāyūn out of India and reigned for six years under the title of Sher Shah, but in 1555 Humāyūn recovered his Indian possessions. Sher Shah during his short reign had completely reorganized the coinage on the basis of a rupee weighing 180 grains and containing 175 grains of pure silver. The few coins that Humayun struck before his accidental death in 1556 are modelled on those of Sher Shah save that the Nagri portion of the legend is omitted. The coins of Akbar follow in appearance those of his father and grandfather, but in weight are based on the model of Sher Shah's coinage. In his earliest gold and silver issues, Akbar adopted his ancestors' titles of etc., but later these were gradually done away with, and only Bádsháh Gházi retained, while the language of the legends was changed to Persian.

For the first three decades of his reign the Kalima continued on the obverse with the names and (generally) the titles of the four companions of the Prophet. The reverse had usually in an area the date and جال الدين عمد اكبر باد شاه غازي and in the margin, the name of mint and one or more titles of the king. Some coins also bear dates on the obverse with the Kalima. Akbar made use of the Hijra era till the 30th year of his reign, when a new epoch was instituted by him called Ilahi. It was composed of solar years and dated from the time of his accession to the throne. The coins issued during the last 20 years of his rule have mostly Ilahi years, with the name of Persian months on one side and on the other الله اكبر جل جلال المجادة الله الكبر جل جلاله الكبر جل على together with the mint name. This formula, which means "God is great, may his brightness shine forth," may also be read as indicating that he wished himself to be regarded as the divine originator of the new era.

Akbar's coinage is famous for its fine execution and for the ornamentation, which consisted of arrangements of words and interlacing of letters in enclosed areas. Representations of living objects and the use of any other script than Arabic are extremely rare. Persian couplets began to form part of the coin legends, and coins of all three metals were issued from a very large number of mints.

The copper coins struck by Akbar are called fulus, damri, tanka, nimtanka (half tanka), chahar hisah (fourth part), hastum hisah (eighth part), and so on.

The coinage of Jahángir followed the mint system of Akbar, but was much more varied. The Kalima was re-introduced and the use of Ilahi years abandoned in favour of Hijra years, although the employment of the Persian solar year and month was allowed to continue for the expression of regnal years. Jahángir used Persian couplets to an inordinate extent, and is the only Muhammadan monarch who ever dared to place his portrait on coins. In one series of coins he is shown sitting on his throne with a cup in his hand. Other novelties among his coins are those struck in the joint names of himself and his consort Nurjahán; and the extraordinary series of Zodiac coins in which the month is indicated by a representation of a sign of the Zodiac. The word Julus (accession to the throne) was first used by him on these latter coins. His copper coins are not numerous, but the additional denomination of روانی (rowani), روانی (rowan), عدل ('adil), (ra'ij), and نيم رائج (half ra'ij) occur on them. He re-struck in this metal Suri coins with his own name, but so badly that in som c ases the Suri legends are still legible.*

^{*} Rogers' Catalogue of the Lahore Museum (Mughal Emperors), preface, VIII.

The gold and silver issues of Shahjahan are even more numerous than those of his father. He ceased placing representations of living things on his coins, and the couplet found on them is

Sháhjahán was the first among the Mughal Emperors of India to employ the word to express the initial year of rule and though the word appears on some coins struck by him during the first year of his reign, he mostly used the word the Kalima continued to be used, and the title Sahib Qiran Sani (the second Sahib Qiran)* was adopted by him in addition to Bádsháh Gházi. Sháhjahán's copper coins are as rare as those of his father, the reason apparently being that those of Akbar and Sher Sháh were still current in sufficient number to satisfy all demands for small change.

The coinage of Aurangzeb is a complete reflexion of the religious principles of this monarch. The use of the *Kalima* on coins was discontinued, as they would have to be handled by unbelievers, and the coins become so stereotyped that the only interest attaching to them are the numerous mint names.

ابو المظفر صحي الدين صحمد او رنگ زيب عالم گير بهادر Although the legend ابد المظفر صحي الدين صحمد او رنگ زيب عالم گير بهادر is occasionally found on the obverse, by far the greatest majority of the coins have the couplet

the word روم is often changed into بدر. The well-known formula on the reverse سنه جارس میمنت مانرس was first used by Aurangzeb, and is almost invariably found fixed to the mint name.

The coins of the later Mughal Emperors do not call for special notice. For the various couplets on their coins pages 111-113 of Codrington's Musalman Numismatics may be consulted. Farrakhsiyar used the title باد شاه باد شاه باد شاه باد الله instead of باد شاه عاري while 'Alamgir II re-introduced once more the Kalima and the names of the four Khalifs of the Prophet on a few of his coins. During the time of Shah 'Alam II, who nominally ruled for 49 years, the Mughal Empire almost ceased to exist, but coins continued to be struck in his name both in a small area which remained under his direct rule, and in the Native States that sprang out of the ruins of the Empire. Akbar II, who succeeded his father Shah Alam II in 1803, was sovereign only in the fort of Delhi, but still

^{*} Taimur was called Sahib Qiran, meaning "Lord of the fortunate conjunction (of planets).

coins were issued by him, and in his name by the rulers of Native States. The broad rupees of considerable artistic merit that were struck by him are rare. Bahádur Sháh II, the last representative of the family of Bábar, came to the throne in 1837 after the death of his father, Akbar II. Two years previously the East India Company had ceased to issue coins modelled on those of Sháh 'Alam II, and had established a uniform coinage of their own for the whole of British India, and very few rupees struck by Bahádur Sháh are known. He continued in possession of the title of Emperor of India until the mutiny occurred in 1857. Bahádur Sháh was then deported to Rangoon, where he died on November 7th, 1862.

[The following list, prepared by Geo. P. Taylor, is quoted from a Chronological List, Numismatic Supplement VII to the Journal of the Assatic Society, Bengal, January 1907.]

ABBREVIATIONS:—E. D. = Elliots' "History of India as told by its own Historians," edited by Dowson, 8 vols. Ersk. = Erskine's "History of India under Babar and Humayun," 2 volumes. Accession, 20: VI: 1014 A.H., Wed., 23: X: 1605 A.D.; Death, 28: II: 1037 A.H., Mon., 29: X: 1627 A.D.;

See E.D. VI. 284, with correction in A.A., I. 212, 213, E.D., VI. 485

Dāwar Bakhsh:

Accession, circa 28: II: 1037 A.H., Mon., 29: X: 1627 A.D.; Deposition, 2: V: 1037 A.H., Sun., 30: XII: 1627 A.D.; Death, 26: V: 1037 A.H., Wed., 23: I: 1628 A.D.; See E.D., VI. 435, 436, 438, and note 2.

b. Shah Jahan I:

Accession, I8: VI: 1037 A.H., Thur.; 14: II: 1628 A.D.;
Deposition, 17: IX: 1068 A.H., Tues., 8: VI: 1658 A.D.;
Death, 26: VII: 1076 A.H., Mon., 22: I: 1666 A.D.;
Coins continued to be struck in the name of Shāh Jahān I, till 4; IX: 1069 A. H., Mon., 16: V: 1659 A.D.;
See E.D., VII: 6, 226, 229, 241, 275.

Shuja:

Rebelled early in 1068 A.H., which year began on Tues. IX: 29, 1657 A.D.:

Defeated, circa 1: IX: 1070 A.H., Tues., 1: V: 1660 A.D.;

Died in 1071 A.H., which year lasted from 27: VIII: 1660, till 1 6 VIII: 1661 A.D.;

See E. D. VII: 218, 214, 241, 253, 254, Beale, 392.

Murad Bakhsh:

Rebelled early in 1068 A.H., which year began on Tues. 29: IX: 1657 A.D.;

Arrested, 4: X: 1068 A.H., Fri., 25: VI: 1658 A.D.;

Died, 21: IV: 1072 A.H., Wed., 4: XII: 1661 A.D.; See E.D. VII. 132, 213, 214, 229.

8. Aurangzeb 'Alamgir I:

Accession, I: XI: 1068 A.H., Wed., 21: VII: 1658 A.D.;

Death, 28: XI: 1118 A.H., Thur., 20: II: 1707 A.D.;

Aurangzeb deferred the issuing of coins struck in his own name till 4 IX: 1069 A.H., Mon., 16: V: 1659 A.D.; See E. D. VII, 229, 241, 386.

Azam Shāh:

Accession, 10: XII: 1118 A. H., Tues., 4: III: 1707 A.D.; Defeated and death, 18: III: 1119 A.H., Sun., 8: VI: 1707 A. D.; See E. D., VII. 387, 391, 398—400.

Kam Bakhsh:

Assumed imperial power soon after the death of Aurangzeb g.v.: Defeated and killed, circa 1: XI: 1119 A.H., Tues. 13: I: 1708 A.D. See E.D., VII. 389, 390, 403-403.

7. Shah 'Alam I, Bahadur :

Accession, 30: I: 1119 A.H., Tues., 22: IV: 1707 A.D.; Death, 21: I: 1124 A. H., Mon., 18: II: 1712 A.D.; See E. D. VII, 392, 556.

8. Jahāndar:

Accession, 14: III: 1124 A.H., Thur., 10: IV: 1712 A.D.; D position, 16: XII: 1124 A.H., Sat., 3: I: 1718 A.D.; Death, 17: I: 1125 A.H., Mon., 2: II: 1713 A.D.; See E.D., VII, 437, 438, 445; Beale 190.

9. Farrukh Siyar:

Accession, 23: XII: 1124 A.H., Sat., 10: I: 1713 A.D.; Deposition, 8: IV: 1131 A.H., Tues., 17: II: 1719 A.D.;

Death, 9: VII: 1131 A.H., Sun., 17: V: 1719 A.D.;

Farrukh Siyar antedated his reign from 1: III: 1124 A.H., Fri., 28 III: 1712 A.D.;

See Beale 130, 131, E.D., VII. 446.

10. Rafi'al darajat:

Accession, 9: IV: 1131 A.H., Wed., 18: II: 1719 A.D.; Death, 23: VII: 1131 A.H., Sun., 31: V: 1719 A.D.; See E.D., VII, 479, 482.

11. Shāh Jahan II (Rafi'al Daulat):

Accession, 20: VII: 1131 A.H., Thur., 28: V: 1719 A.D.; Death, 22: X: 1131; A.H., Thur., 27: VIII: 1719 A.D.; See E.D. VII. 482, 485.

Niku Siyar:

Accession, 9: VI: 1131 A.H., Sat., 18: IV: 1719 A.D.; Deposition, 27: IX: 1131 A.H., Sun., 2: VIII: 1719 A.D.; Death?

Grave doubt attaches to the attribution to Niku Siyar of the coins commonly assigned to him.

See E.D. VII., 482, 484.

Ibrahim:

Accession, 9: XII: 1132 A.H., Sat., 1: X: 1720 A.D.; Defeat, 18: I: 1133 A.H., Tues., 8: XI: 1720 A.D.; See E.D. VII, 509, 512, 515.

12. Muhammad:

Accession, 15: XI: 1131; A.H., Fri., 18: IX: 1719 A.D.; Death, 27: IV: 1161 A.H., Fri., 15: IV: 1748 A.D.; See E.D. VII: 485; VIII, III.

13. Ahmad Shah Bahadur:

Accession, 2: V: 1161 A.H., Tues., 19: IV: 1748 A.D.; Deposition, 11: VIII: 1167 A.H., Mon., 3: VI: 1754 A.D.; Death, 28: X: 1188 A.H., Sun., I: I: 1775 A.D. See E.D. VIII 141: Beale, 42.

14. 'Alamgir II:

Accession, 11: VIII: 1167 A.H., Mon., 3: VI: 1754 A.D.; Death, 20: IV: 1173 A.H., Tues., 11: XII: 1759 A.D.; See E.D. VIII, 141, 243.

Shāh Jahān III:

Accession, 20: IV: 1173 A. H., Tues., II: XII: 1759 A.D.; Deposition, 29: II: 1174 A. H., Fri., 10: X: 1760 A.D.; Death?

See E.D. VIII, 243, 278.

15. Shah 'Alam II:

Accession, 5: V: 1173 A. H., Tues., 25: XII: 1759 A.D.; Death, 7: IX: 1221 A. H., Tues., 18: XI: 1806 A.D.; See E.D. VIII, 172; Beale, 361.

Bidar Bakht:

Accession, 7: IX: 1221 A.H., Fri., 29: VIII: 1788 A.D.; Flight, 8: I: 1203 A.H., Thur., 9: X: 1788 A.D.;

Death?
See Beale, 106.

16. Akbar II:

Accession, 7: IX: 1221 A.H., Tues., 18: XI: 1806 A.D.; Death, 28: VI: 1253 A.H., Fri., 29: IX: 1837 A.D.; See Beale, 46.

17. Bahādur Shāh II:

(We here retain the commonly accepted designation of this sovereign. Before his time, however, three of the Emperors, Aurangzeb, Shāh 'Alam I and Ahmad Shah, had all, as evidenced by their coins, borne the name of Bahadur.]

Accession, 28: VI: 1253 A.H., Fri., 29: IX: 1837 A.D.;

Deposition, 13: VIII: 1274 A.H., Mon., 29: III: 1858 A.D.;

Death, 14: V: 1279 A.H., Fri., 7: XI: 1882 A.D.;

See Beale, 95; Holmes' "History of the Indian Mutiny," page 387.

- LIST SHOWING THE PERIOD DURING WHICH THE RULERS MAY BE HELD TO HAVE CAUSED COIN TO BE STRUCK AND THE DATES OF THE FARLIEST AND OF THE LATEST KNOWN SPECIMENS IN GOLD OR SILVER OR COPPER OF EACH REING DR. P. TAYLOB, LOC. CIT.

(a) "Is used like the alif of Hindostani, merely as a fulcrum for carrying the other vowels when they are initial" (Grierson). The inherent vowel sound in Ahōm being \bar{a} , vowels have only to be indicated when a consonant has a different vowel sound than \bar{a} . (b) In combination, the prefix of this vowel is omitted. (c) In combination, if the suffix be omitted, this vowel sometimes stands for le as in "lend". (d) Only found in open syllables. (e) In combination the suffix is dropped.

The consonant and vowel columns give the forms of the letters as found in the Āhōm Buranjis.

ĀHŌM MUHUR OF RĀJESVARA SIMHA (SÜREMPHA).

(CABINET OF THE BRITISH MUSEUM-UNIQUE),

OBVERSE.

- $s\ddot{u}$, tiger, (1) Chao, the God,
- $ph\bar{a}$, heaven, (2) rem, border, pin, became, (3) khün, King, (4) Raisinā. *lāknī*, year,

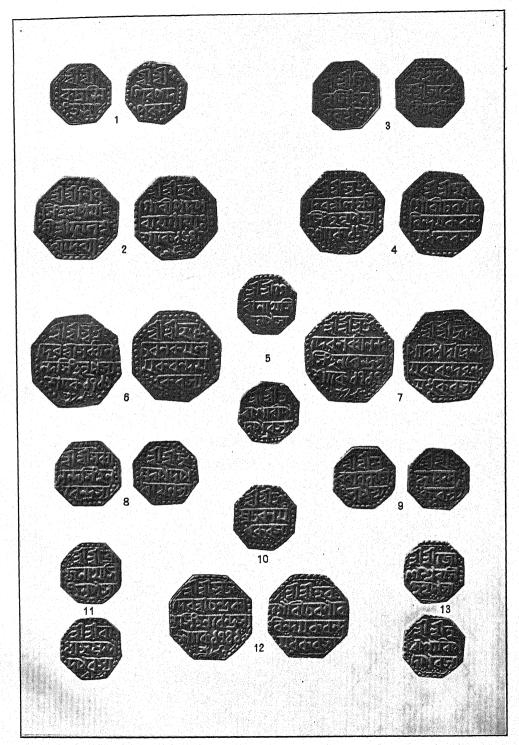

"The God, Süremphā (the tiger from the border of heaven), became King in the year Raisīnā" (43rd of the 20th taosīnā, or cycle of 60 years counting from 568 A.D. =1751 A.D.).

REVERSE.

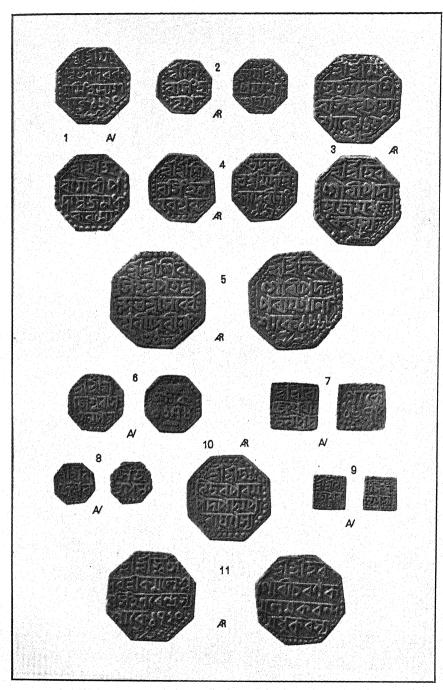

- boi, prayer, (1) Kao, I, (2) phā, heaven, Lendá
- (3) n, hě-u, offer, chü, name.
- "I offer prayer in the name of the heavenly Lendan" (i.e., Indra).
